Sirenum Financials

((sirenum))

75% faster than your current payroll process

Giving you back the time to do what matters

As much as a third of management hours is spent on time interpretation for the payroll of hourly, remote, and mobile employees according to our research. This human resource time increases even further when you take into account budgets, invoices, and expenses too.

Sirenum is the most flexible dynamic workforce financial tool available, and we pride ourselves on being able to handle even the most intricate and difficult rate-setting complexities. These specific settings can take into account pay differences based on number of shifts complete, time and day of the shift, and so much more. We do all the hard work so you don't have to.

Sirenum dramatically improves all sorts of financial processes, leaving you with more time to focus on what matters. We take care of your invoice management, time interpretation, budgets, expenses, and so much more, meaning needs are met in a fraction of the time.

Benefits

- Ensures all payroll is accurate, on time, and low cost, dramatically reducing payroll enquiries
- Previously resource intensive processes are reduced
- Reliable and correct data to your payroll processor with minimal input
- Produce budgets and invoices for staff-related costs quickly and easily
- Enables management to get back to the tasks that add more value

Features

- Expense Management
- Payroll Approval
- Budget Control
- Invoicing

"Switching to Sirenum not only saved time, it improved the quality of payroll data."

- Maryam Hussain, Operations Director at ProActive

4% Lower Cost of Labour • 75% Faster Payroll

Uniquely Flexible Rate Cards

Sirenum is unique in the way it can effectively deal with even the most intricate payment models. Rate cards are easily set up and run through the system. You can define rates for specific worker ages, locations, responsibilities, start and end times, days of the week, overtime rates, break definitions, and much more.
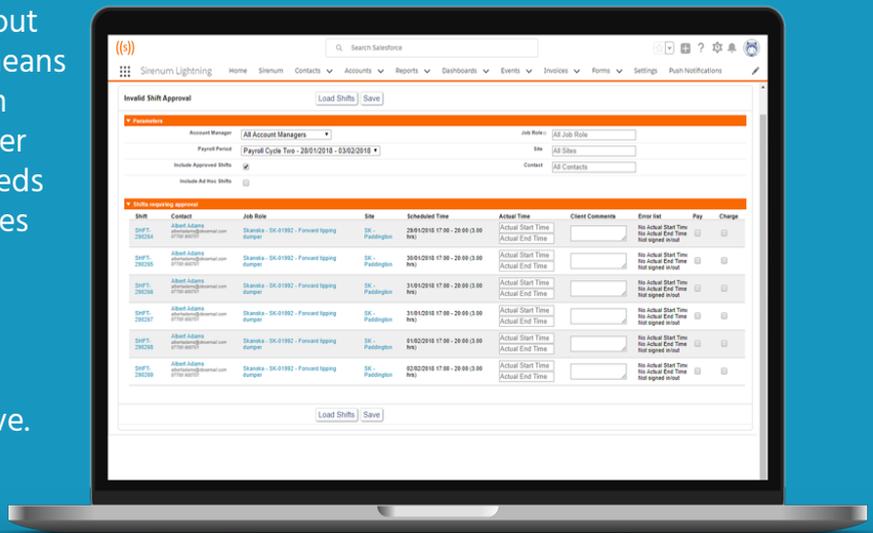

Our time interpretation engine is the most flexible available in the industry - there is no environment too complex to handle.

Quick and Simple Payroll

When it comes to payroll, manually approving each shift or chasing proof of sign in and out times is labour intensive. Using Sirenum means all of this data is already captured through workforce monitoring tools, with no further proof required, reducing due diligence needs by up to 75%. Sirenum's technology ensures that the correct data is delivered to your processor with minimal input, increasing your financial efficiency.

It's not just payroll we simplify and improve. Budget preparation and management, invoice creation, profitability reporting, and income analysis are just some of the other ways we improve internal processes.
