

# Sirenum Engage

The only **complete, branded, and configurable** mobile engagement app.

**Engage your workers to reduce employee turnover**

These days, our employees expect a top-notch mobile engagement experience. Digital engagement is proven to attract talent and reduce operational costs.

Sirenum Engage is a complete engagement platform that **unifies all digital engagement channels** such as onboarding, payslips, job opportunities, geofenced clock-in, timesheeting, HR, expenses and more.

It's bespoke and white-labelled – so you can use your secret sauce in attracting and managing your talent. With Sirenum Engage you can add your own touch by your own onboarding, HR and operational process.

Sirenum Engage will delight your staff. It provides the one thing we all want – control over our lives. Your talent can view jobs, apply, receive shift alerts, clock in, submit their timesheets, upload their expenses and even chat with their hiring manager or their colleagues. All in one tool. Too good to be true? Book a demo today!

## Benefits

- Reduce onboarding costs by up to \$100 per person
- Launch your own self-service, branded mobile app in six days
- Process payroll 75% faster
- Reduce HR costs by 56%
- Reduce absenteeism by 41%

**Reduce costs** • **Reduce employee turnover** • **Mitigate risk**

## Comprehensive

“To stay competitive, we need to make onboarding cost effective and pleasant for our candidates”, said one of our clients. “We have a whole suite of digital channels for our staff. But our staff have to download one mobile app to get onboarded, one to receive their shifts, a third to upload their expenses, a fourth to view their payslips.... That won't do!”

Are you also struggling with multiple applications? Do you also get frustrated with remembering the passwords to all your apps? This is why we created Sirenum Engage, a complete engagement experience to aggregate all engagement channels into one attractive mobile solution.

## Bespoke

Sirenum understands recruitment. We know that a senior IT developer is onboarded differently to nurses or chefs. We know you need to design your processes with each of your roles. We know that one size does not fit all.

That is why Sirenum Engage is not a mobile app, it is a mobile platform. With Engage you can create custom business flows per job. Adding screens, buttons, flows and even full functionalities can be done quickly, cheaply and most importantly – by your own IT team.

## Branded

The relationship you have with your candidates IS your business and you must protect it. Engage will protect your brand, and your relationship by building a comprehensive digital engagement solution – with your own brand.

## Build vs Buy? No Contest

Sirenum Engage is doing to mobile engagement apps what Salesforce did to CRMs. That's why we call it an engagement platform. Engage makes buying the technology the obvious option with a quick time-to-value, low costs, and seamless upgrades to ensure your brand is as snazzy in five years as it is today.

You wouldn't dream of building your own CRM. Yet not long ago, standard CRMs could not support the secret sauce – your special engagement process with clients that made your businesses stand out. Revolutionary CRM technology changed all that, and these days many business are replacing their legacy CRMs with Salesforce or its competitors at a great cost.
