

((sirenum))

Customer Reference

One of the leading train operating companies in Britain, GWR manages over 2,000 engineers across nearly 200 stations and seven depots. GWR first adopted Sirenum in 2015 at just one depot to help with managing fatigue and risk of its employees. In 2017 the company chose Sirenum to manage its entire engineering workforce.

“Sirenum's ability to warn management of at-risk colleagues nearing their limits is innovative and has had a major safety benefit.”

O Hidden breaches since the rollout of Sirenum

“Sirenum is a significant contribution towards safety improvement in the rail industry and has set a new standard for best practice.”
